RFQ CHECKLIST

What to send for a fast quotation on aluminium profiles

Send these details with your enquiry and our team can review feasibility, propose the right die and prepare your quotation without extra rounds of questions. Not everything is required: send what you have.

1 Drawing

- ☐ Cross-section drawing with dimensions (DWG, DXF, STEP or PDF)
- ☐ Tolerances, and the standard you work to, if any (e.g. EN 755-9, EN 12020-2)
- ☐ Critical dimensions and functional surfaces marked
- ☐ Visible surfaces marked, for coated or anodised profiles

2 Material

- ☐ Alloy (e.g. 6060, 6063, 6005A, 6082)
- ☐ Temper (e.g. T5, T6) or required mechanical properties

3 Surface finish

- ☐ Mill finish, powder coating or anodising
- ☐ Powder coating: RAL colour, gloss level and texture
- ☐ Anodising: colour and layer thickness
- ☐ Quality label required, if any (e.g. Qualicoat)

4 Lengths and machining

- ☐ Profile lengths and length tolerance
- ☐ Machining needed: cutting, drilling, punching, CNC
- ☐ Machining drawing, if machining is required

5 Volume and timing

- ☐ Estimated annual volume (kg, metres or pieces)
- ☐ First order quantity and expected order rhythm
- ☐ Target date for samples and first delivery

6 Packing and delivery

- ☐ Delivery destination and Incoterm
- ☐ Packing: protective film, bundle size, pallets or crates
- ☐ Labelling requirements

7 Documents

- ☐ Certificates and test reports you need with each delivery
- ☐ Data you need for EU import reporting (CBAM)

8 Your contact details

- ☐ Company name and country
- ☐ Contact person, email and phone

What happens next

1. Our technical team reviews your drawing.
2. You receive a feasibility assessment and a die proposal, or the matching standard profile.
3. We send a quotation with the delivery plan.

Ready? Send your drawing.
